## INTRODUCTION

Man, the apex of God's creation, was created to live forever, for he was created in the image and likeness of God. However, Adam, through his carnal choice, became a sinner, and traded off God's image and likeness, in exchange for the image and likeness of the devil.

Apparently, the sin nature was passed on like a baton from Adam to his seeds, and generations thereafter. Bad news! However and subsequently, the good news is that the blood of Jesus has brought us into acceptance before God, and has cleared away the original sin that deprived us of being in the image and likeness of God.

It is high time; therefore, the church learnt something about the power in the Blood of Jesus. The world needs this spiritual truth today, more than ever; it should not be allowed to continue to gather dust on the shelf. Every Believer should be fully aware of the significance of the power in the blood of Jesus.

“Christonic” means, being with Christ or the power of Christ, while “Lymphology” means the study of the Blood. The aim of this book is to build your confidence and faith in the Blood of Jesus. It is my belief that the Blood of Jesus will take on a new meaning in you, as you go through the pages of this book. I am confident that God will use this anointed book to turn your life around for the best which He intends for you.

God loves you, so do I.

# CHAPTER 1: THE IMPORTANCE OF BLOOD

It is important for us to understand that blood is a priceless commodity. Without the liquid called blood flowing through man, there is no life. There is no greater symbol of life than blood. *Leviticus 17:11* states, “*the life of the flesh is in the blood*”; in the same sense, the life of every creature is in its blood.

Therefore, God specifically told the Jews in the Old Testament not to drink or eat the blood of an animal, in order to protect them from infection, and this is because most deadly diseases are transmitted through the blood. For example, the dreaded disease HIV/AIDS is transmitted through the blood. Moreover, through the blood, the characteristics of the slain animal might be passed unto them, just as we inherited Adam and Eve’s sin through blood. *Acts 17:26* clearly shows that God created all nations from one blood. Therefore, spiritual and natural life is in the blood.

It must be emphasized that blood does various things in our system. The blood carries oxygen to various parts of the body. If Oxygen is not carried to all the cells of the body, the body will degenerate, as Oxygen burns the food nutrients to give the body energy.

The blood also carries food to all the parts of the body when we eat, and the body oxidizes it; this process is called metabolism. The blood also removes waste from the body, because if waste (toxin) is not removed from the body, one’s health would be in jeopardy. There must be a waste product from any chemical reaction.

There are three components of the blood, namely, the white blood cells, the red blood cells and the plasma. The white blood cells fight diseases, while the red blood cells carry oxygen and food to all the parts of the body, and they are produced in the bone marrows. The lack of this makes one Anaemic.

The third element of the blood called plasma, means “*giver of life*”. It carries the properties of the white and red blood cells, and we need the plasma to rejuvenate us.

When you take a look at the blood circulatory system, there are organs which move blood, and these are the heart, arteries, veins and capillaries.

Arteries carry blood from the heart to the rest of the body, while veins carry blood from all parts of the body back to the heart.

Have you noticed that the human heart is like a pump that can live up to 150 years without change, repair or service? Research shows that the human heart beats (expands and contracts) 100,000 times per day, (according to web MD); it does not have any rest. When you are asleep, your heart keeps on beating and pumping; that is a rare miracle.
